

FORZA ELD App Permissions

This presentation outlines the necessary permissions for the FORZA ELD app on Android and iOS devices.

Android Permissions

Location

Set to Always for accurate tracking.

Bluetooth

Enable for connecting to ELD devices.

Background App Refresh

Allow for continuous operation.

Cellular Data

Enable for data usage.

iOS Permissions

Location

Set to Always for accurate tracking.

Bluetooth

Enable for connecting to ELD devices.

Background App Refresh

Allow for continuous operation.

Cellular Data

Enable for data usage.

Permission Steps

Open Settings

From your device's home screen.

Select FORZA ELD App

Scroll down the Settings screen.

Grant Permissions

Enable toggles for Location, Bluetooth, Background App Refresh, and Location Data.

Why Permissions are Needed

- 1 Location Tracking
Accurate tracking of vehicle location.
- 2 Bluetooth Connectivity
Communication with ELD devices.
- 3 Background Operation
Continuous monitoring and data recording.
- 4 Data Usage
Data transfer for logging and reporting.

Benefits of Enabling Permissions

Compliance

Meet regulatory requirements.

Safety

Enhanced driver safety features.

Efficiency

Streamlined operations and data management.

Troubleshooting

Check device settings.

Restart the app and device.

Contact FORZA ELD support.

Key Takeaways

Enabling permissions is crucial for the FORZA ELD app to function properly. By granting access to location, Bluetooth, background app refresh, and cellular data, you ensure compliance, safety, and efficiency.
